ABOUT US

RESUMOD

Resumes that take you places!

Website: <https://resumod.co>

Resumod.co is a Resume Parsing, Building and Analysis software with AI at its core. It was launched in 2019 by the founders of global resume writing business GetSetResumes. Currently Resumod is used by over 100,000 job seekers from 160+ countries as well as by businesses in India and UK.

BUSINESS OFFERING

If you run a Recruitment Business or your organization has a recruitment process where HRs run through hundreds of resumes every day, Resumod can help you cut down costs through its business offerings.

PARSING, REFORMATTING, REBRANDING

Our state of the art parser reads and reformats any resume with a 85% accuracy within seconds. This gives you a standard business format for all resumes. Moreover you get the additional benefit of masking info and rebranding the resume with your logo.

RESUME ENHANCEMENT

With ChatGPT+ inbuilt, and access to a huge database, Resumod gives you unlimited options to enhance a resume with relevant keywords and skill sets. You also get grammar and contextual check.

SEARCH, MATCH & SORT

Our parser allows indexing of every resume which makes it easier to match resumes with target Job Descriptions and return a filtered result sorted by relevance.

DETAILED FEATURE LIST

CASE STUDY

How a New York-based information technology and consulting company with 13000 employees cut costs and sped up its recruitment process through Resumod Business.

**client name confidential in accordance with NDA*

PROBLEM

The business in question works in 13 countries and has a vast recruitment process spanning multiple timezones. Consequently recruiters work round the clock in shortlisting candidate resumes and sharing them with analysts for reformatting and uploading to client portal. The India team also works round the clock in 3 shifts to deliver resumes.

During peak season, the business sees 300-500 resumes a day and a team of 25-30 analysts is needed to support this demand.

HOW RESUMOD HELPED

1. Resumod provided the analyst team with a Dashboard, In-built parser and builder.
2. Dashboard supports multiple agent logins, along with an email inbox where recruiters can directly send resumes that need to be processed.
3. Agents can parse and reformat 100 resumes in one go through bulk (zip) upload as well as email upload.
4. Parser uses advanced skills taxonomy to identify and auto pick skills from resumes and list them down. Parser also calculates total years of experience.
5. Builder provides additional functionality to check and review each resume.
6. Dashboard provides functionality to use labels, filters, sort and mark resumes.

RESULTS

**67% decrease
in Resume
Processing Time**
From 60 min to 20 min.

**50% decrease
in Manpower Cost**
Team size optimized from
25 to 12 agents
