

# Accelerate Placements & Give Students an Edge

Resumod for University is an extension of Resumod's jobseeker app which helps students and professionals with resumes, analysis and job search.

Resumod's AI enabled builder, CV Scoring, and Job Match help students with crucial information on where they can improve and how they can approach jobs with confidence.

Through state-of-the-art analytics and reporting, Resumod helps universities accelerate their student placements. Our Pathfinding algorithms and tools ultimately give students an edge in the highly competitive global job market.

# DETAILED FEATURE LIST

**Customised branded Resume Templates** with the University Logo and private URL (e.g. URL – <https://ipuniversity.resumod.co>)

**Job Matching & Resume Scoring.** Score your resume against a target job and get detailed report on how to improve.

**AI and ChatGPT+ integrated.** Generate new content, skill, and job specific bullet points to enhance resume quality using our AI tools.

**Resume Analysis & Analytics.** Get a detailed report on how to improve your resume, keywords, grammar, sentence scoring, and overall diction.

**Grammar & Spell Check** along with contextual, syntax and semantic check.

**Parse existing resumes,** without the effort of recreating entire resumes from scratch.

**SSO – Single Sign On** feature to directly login with the University ID.

**Auto picking of Skills** from Resume, without manual effort.

**Soon:** Resumod's AI is being prepared to provide suggestions on future course, certifications and upskilling as well as jobs based on resume analysis.

**Data Security Guaranteed.** All data on world class encrypted AWS and MongoDB servers. No sharing of data with third parties.

# BENEFITS

By using Resumod's resume analysis and reporting, universities can see an almost 50% increase in off-campus placements.

**3x increase  
in Student  
Participation**

Peer performance plays an important factor in student confidence. With a poor resume, students lose interest in placements especially off campus placements. Resumod's analysis provides actionable insights on how students can improve their resume targeting specific jobs. The results is a more confident student, and better prospect of clearing a job interview. Online profiles also increase visibility and open up more job opportunities and discovery for students.

**50-80% decrease  
in Training Costs**

Resumod's AI provides students with feedback and guidance at the right junctures enabling them to create Resumes and upskill without any external support. Moreover, with advanced reporting and analytics, placements authorities can monitor progress of each student without hiring any external partner.

**Better Analytics >  
Better Decisions**

The software can provide universities with valuable analytics and insights on students' resume-building activities. Universities can gain a deeper understanding of the skill sets and career preferences of their students, allowing them to tailor their career development programs, internships, and job placement services to better meet students' needs.

**Singular Branding** maintains consistency in the resumes created by students from the same institution and showcase the unique strengths and offerings of the university to potential employers.

With time, Resumod will **integrate with popular job portals** which will make it easier for students to upload their resumes directly to these platforms. Also university gets centralized access to student resumes for review and support.

Resumod will be extended to **include an alumni network feature**, allowing students to connect with alumni who can provide guidance, mentorship, or job referrals. This feature will foster a stronger sense of community and collaboration within the university ecosystem.
